

Final Review Paper

Winter 2024

Deadline: Mar 20, 2024, 11:59 PM
(Upload it to Gradescope.)

You need to write a four-page IEEE-style review paper. The review should be based on the papers in the reading list ([link](#)). Pick any of these papers and write a brief review for that and three relevant papers.

Write your review using this format:

1. Summary: In a few paragraphs describe what each paper is about (e.g., the main problem addressed by this paper, the main contributions, the solutions, the evaluation methodology, etc.
2. Novelty/Contribution: In your view, what were the main new concept(s) presented in the paper in each paper? Be concise.
3. Evaluation: Describe how they evaluated their contribution. Comment on whether you found it convincing or not? What else could have been done? What was the Threat Model? You can combine the papers if they share similar setups.
4. Unique Strength/Weakness: In your opinion, what did you specifically really like about this paper / alternatively, if you didn't like this paper, what was the main reason? Compare the papers.

You can find the template for your review here:

<https://www.computer.org/csdl/journal/ca/write-for-us/15055> (pick the IEEE CAL journal template from the selector). Don't forget to cite the papers.

What to submit:

Your final review in pdf.

Good luck!
